

ET/DATA/A

Automatic labeling machine complete with entry belt to put in line with the existing seaming machine, label unwinder, orientation and labeling station and exit belt. Suitable for small cans

Automatic universal machine for applying any type of labels on cans up to 10 Kg. The labels can be partial, completely enveloping or front and back. Machine complete with date and lot stamp.

On request: we can supply support for IoT system connections. In this case, the machine would comply in all respects with the requirements for the Industry 4.0 amortization plan.

For more information, please contact us.

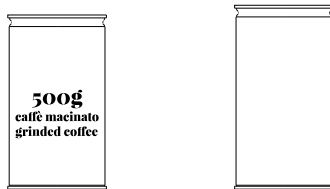

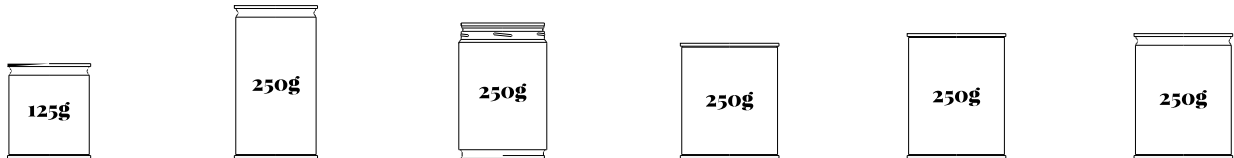

- Easy to use
Thanks to the simplified control panel, the stain is extremely simple and of immediate use.
- Suitable for big formats
With extreme ease, moving a roller it will be possible to label cans up to 10 kg.
- With selfinking stamp
By means of a selector it is possible to include or not the stamping operation. The selfinking stamp allows you to produce thousands of pieces without stopping.
